

Why should you consider using NATROX® Oxygen Wound Therapy?

There are lots of reasons why wounds fail to heal. However, oxygen is a critical component in wound healing^{1,2}. Unfortunately, wound perfusion is frequently insufficient in patients with chronic wounds, thereby reducing the wound's capacity to heal³. Supplementary oxygen can help improve healing.

NATROX® Oxygen Wound Therapy is a simple, mobile device which is designed to deliver pure humidified topical oxygen continuously (24/7) to the wound bed.

It is intended for use on complex, slow healing or non-healing wounds such as:

DIABETIC FOOT ULCER

LEG ULCER

PRESSURE INJURY

NON-HEALING SURGICAL WOUND

NATROX® O₂ can be used during any phase of wound healing, and works with any secondary wound dressing.

When to consider NATROX® O₂⁴

- If there are clinical signs that the wound is hypoxic.
- If the wound has failed to respond to standard of care.
- If the patient has underlying conditions or risk factors that make them more susceptible to wound complications.

What NATROX® O₂ delivers for you

CLINICAL EFFICACY

71% greater healing rates compared to SOC alone.⁵

PATIENT SATISFACTION

90% patient satisfaction scores,⁶ supporting patient compliance.

NATROX® Oxygen Generator

NATROX® Oxygen Delivery System

TIME

Quick dressing changes and minimum debridement required, freeing up time.⁷

HASSLE FREE

No out of hour service/support required. Ability for patient/caregiver to self manage.

Designed simply to **HEAL**
W  **UNDS**
